

# Avanan – Hands-On Assignment

## Requirement

Create a **Star Wars movies catalog** using the API: <https://swapi.info/>

*Note: All requests must use HTTPS.*

You may use any modern framework (Angular, React.js, etc.) and any CSS library to build a clean and appealing UI.

## App Requirements

- Title – the movie title
- Release date
- Opening crawl
- Director
- Producer
- Characters – opens a drill-down component with:
  - Name
  - Height
  - Mass
  - Hair color
  - Skin color
  - Eye color
  - Birth year

## Bonus Points

- Movie search – add a search bar to filter movies by film name.
- Additional drill-downs for: Starships, Vehicles, Species.

## Submission

You may use any framework. Submit the assignment via GitHub, Bitbucket, or as a ZIP file (without the node\_modules folder).
